**Learning about Bereko**

**Electricity and power**

Imagine doing your homework by lamp light

# In Bereko rainwater is harvested from the church roof

It is stored in large underground containers

# Bereko's new health centre

See how they keep medicines cool without a fridge

The outside is finished

Now it needs finishing inside, electricity and water

## Washing clothes without electricity

## Cooking without electricity

## Ironing clothes without electricity

This iron is filled with hot charcoal from the fire

## Ways of getting water

They collect water from a well, by hand or with a hand pump

They sew beautiful clothes without electricity

Hand sewing machines

See how people in Bereko heat water

In pans that collect the heat from the sun

Boiling water over an open fire

They even make charcoal stoves without electricity

Maternity ward with no electricity

Women and children collect water  
They start doing this at 6am, when the sun rises
